SUMMARY

Highly accomplished **Power Platform Solutions Architect and Project Delivery Lead** with over 12+ years of experience in strategic integration and business process optimization. Proven history of designing, developing, and implementing scalable, secure, and high-performance cloud-based solutions using the full Microsoft Power Platform suite.

- **Power Platform Mastery:** Proficient in Power Apps (mobile & desktop), Power Automate (Cloud/Desktop/complex workflows), Power BI, Power Apps Portal, Dataverse, and Dynamics 365 CRM. Experienced in developing AI-powered agents using **Microsoft Copilot Studio** for intelligent automation and integrating Generative AI into enterprise applications.
- **Architecture & Integration:** Skilled in conducting "fit-gap" analysis , designing comprehensive data strategies, and integrating Power Platform with external applications, ERP systems, and legacy databases via custom connectors, Dataverse Web API, Azure Functions, Logic Apps, and custom C#/.NET Core web services.
- **Governance & ALM:** Expertise in designing and implementing policies for environment management, Data Loss Prevention (DLP), and Application Lifecycle Management (ALM). Implemented monitoring via the Power Platform CoE Starter Kit.
- **Core Expertise:** Spans the entire information systems lifecycle, including process analysis, conceptual design, development, thorough documentation, user training, and final implementation.

.

EXPERIENCE

03/2025

Malaysia

Solution Architect

DSS Software Solutions Sdn. Bhd

- Designed and delivered comprehensive Power Platform and RPA solutions, ensuring security, scalability, and performance standards.
- Developed AI-powered agents using Microsoft Copilot Studio to enhance business workflows, integrating NLP and generative AI into enterprise applications and enabling intelligent automation across CRM, ERP, and data analytics systems.
- Built mobile and desktop Power Apps for distribution centers, integrating them with Power BI for analytics.
- Designed a comprehensive data strategy, including data modeling in Dataverse, source selection, and data migration planning, understanding the difference between structured and unstructured data.
- Leveraged custom connectors and the Dataverse Web API to integrate Power Platform with external applications, ERP systems, and legacy databases.
- Designed and developed custom APIs and web services using ASP.NET Core and C# to expose complex business logic and secure data access to the Power Platform via custom connectors.
- Automated approvals and notifications using Power Automate (Flow) based on dynamic criteria.
- Developed a Power App for expense reporting, cutting manual data entry by 20% and enhancing data accuracy.
- Engineered end-to-end integrations between cloud/on-prem systems using Azure Logic Apps, Power Automate, and custom APIs.
- Utilized methodologies such as Agile and Waterfall along with SDLC implementations.

02/2019 - 12/2024

Malaysia

Development Team Lead

PPG Coating (M) Sdn. Bhd

- Analyzed business processes and identified Power Apps opportunities
- Delivered integration projects with a maximum potential benefit of $500,000 per year.
- Achieved a reduction of 45,000 manual work hours annually through automation.
- Increased the velocity of month-end closing by three working days.
- Led the analysis of business processes with technology teams to identify Power Apps opportunities and assess integration feasibility.
- Managed and drove change requests for existing RPA and Power Platform processes, adhering to a structured change control process.
- Developed and implemented robust integrations between various on-premises and cloud-based systems using Azure Logic Apps, Power Automate, and custom APIs.
- Designed and implemented ETL processes (Extract, Transform, Load) to move and transform data between systems, ensuring data accuracy and consistency.
- Built and deployed custom business applications using Power Apps and automated workflows with Power Automate, integrating with various systems using Azure Functions.
- Delivered integration projects with benefits of $500k/yr and reduced manual work effort by 45,000 hours annually
- Developed and implemented robust integrations using Azure Logic Apps, Power Automate, and custom APIs
- Designed ETL processes ensuring data accuracy and consistency
- Extensive experience using Kingswaysoft and Power Automate for backend application integration

EXPERIENCE

11/2015 - 02/2019

Gurgaon, India

Software Developer

UnitedHealth Group

- Designed and developed web applications and back-end applications based on user requirements and business analysis.
- Constructed business logic using C# and object-oriented principles, developing various abstract classes, interfaces, and classes.
- Performed design and development of ASP.NET 4.5 web applications using C#, separating user interface logic from business logic.
- Built ETL processes using SSIS and SQL Server stored procedures.
- Programmed ADO.NET for application-database communication, utilizing Data Grid, Data Set, Data Table, Data Views, Data Adapter, and Data Readers for reporting.

06/2014 - 11/2015

Gurgaon, India

Software Developer

Experis IT India

- Designed and developed ASP.NET web forms with custom controls
- Designed and developed ASP.NET 4.0 Web Forms with integrated custom controls and user controls.
- Implemented the ASP.NET membership provider to manage user base.
- Gained hands-on experience in using ASP.NET AJAX, jQuery, and .NET controls like chart control.
- Set up a new automated build process to support continuous integration using Jenkins, NUnit, Git, and MSBuild.
- Developed user interactions in JavaScript, jQuery, and AJAX for forms developed in HTML5.
- Used the ASP.NET MVC framework to support dependency injection for injecting objects into classes, instead of relying on the classes to create the objects themselves, and used log4net for logging at various levels of the application.
- Programmed ADO.NET for communication between the application and the database, extensively using Data Grid, DataSet, DataTable, DataViews, DataAdapter, and DataReaders to render reports.
- Implemented ASP.NET membership provider
- Set up automated build process using Jenkins, NUnit, Git, and MS Build
- Developed user interactions in JavaScript, jQuery, and Ajax
- Used ASP.NET MVC framework and log4net for logging

EDUCATION

07/2009 - 06/2013

India

Bachelor of Technology (IT)

Uttar Pradesh Technical University

CERTIFICATION

PL-600: Microsoft Power Platform Solution Architect

Building Chabot's using Google Dialog flow

Building Intelligent Chabot's on AWS

KEY ACHIEVEMENTS

4x PPG Way Copper Star

Successful go-lives and rapid resolution of production issues at PPG

3x The PPG Way Star Award

Leadership in hiring, UAT support for EMEA processes, and contributions to RPA project

2x You are a star Awards

Honored for exceptional performance and dedication

SKILLS

Power Platform

Power Apps | **Power Automate** | **Power Virtual Agents** | **Dataverse** | **AI Builder** | **Copilot Microsoft** | **Dynamics 365 CRM**

Cloud Computing

Azure DevOps | **Logic App** | **Azure Function**

SKILLS

Software Development

.NET | C# | VB.Net | Python | JavaScript | jQuery | HTML | CSS | Angular | API | Kingsway Soft

Data & ETL

SQL | PostgreSQL | OracleR12 | NoSQL | Excel | Power BI | Azure Data Factory | Azure Databricks | Azure Synapse Analytics | Spark | Star Schema | Snowflake Schema | SSIS

Development Practices

TDD | Code Review | Collaboration | Planning & Estimation | Agile Development Practices | CI/CD Pipelines | ALM 16
