Dimuthu Pahindra

CTO | AI Venture Builder | Data Scientist & AI/ML Engineer | Infrastructure Architect | Product-Focused AI Innovator

Personal Info

+60183141929

dpahindra@gmail.com

Kuala Lumpur, Malaysia

ID Number
linkedin.com/in/dimuthu-pahindra-a96337161

Nationality
Sri Lankan

Date of birth
1997/01/13

Skills

- Algorithms & Automations
- E Commerce, Branding Strategies & Marketing Analytics
- Business Intelligence & Information Systems
- Corporate Finance & Cost Optimization
- Data Analytics & Data Visualization
- Python, JavaScript, TypeScript, HTML, CSS, React.js, Node.js, Express.js, PHP, VBA, Microsoft Office, G-Suite, GCP, Azure
- Research & Development
- REST API, Tensorflow, Pinecone, FAISS, Selenium,Graph Neural Networks (GNNs), PyTorch, PostgreSQL, MongoDB, Git, Pandas, Numpy, Linux, Docker, CI/CD
- Risk management processes

I am an AI engineer and venture strategist specializing in the development of **intelligent infrastructures** that operate as both business enablers and scalable product platforms. My work focuses on building **infrastructure-pegged software and ventures,** where AI systems are designed not merely to support workflows but to automate, scale, and evolve them.

As **Co-Founder & CTO at Outer Insights**, I lead the design and deployment of autonomous, AI-powered systems that transform operational processes in investor engagement and capital markets. Our proprietary platform integrates **retrieval-augmented generation (RAG), vector search, multi-agent orchestration**, and cloud-native architectures to automate critical business workflows and deliver scalable growth.

My expertise extends beyond system design to **applied AI innovation**, where I embed research-driven thinking directly into product development. Across my roles, I have led **hands-on R&D** in areas such as **neural architectures, vector databases, agentic orchestration**, and autonomous infrastructure systems—ensuring that every solution I build is grounded in frontier AI techniques yet designed for practical, commercial deployment.

In parallel to my industry work, I am pursuing a **Master's in Artificial Intelligence at Monash University**, deepening my academic foundation across machine learning, deep learning architectures, and AI system design. This formal academic training complements my professional R&D, sharpening my ability to translate complex AI concepts into commercially viable infrastructure and software products.

With a professional background in **Economics, Finance, and Accountancy**, I approach AI engineering from a strategic, business-aligned perspective. Whether automating financial processes, designing SaaS platforms, or optimizing digital infrastructure for scalability, I engineer systems that deliver both technical precision and commercial outcomes.

My work spans **capital advisory, SaaS, manufacturing, and e-commerce**, consistently focused on building infrastructures that not only drive efficiency but become platforms for continuous product innovation and venture growth.

Work Experience

Co-Founder & CTO, Outer Insights Inc, British Columbia, Canada/USA

December 2023 - Present

- Combinatorics/Discrete Optimization
- Software, ERP & Systems Infrastructure, Machine Learning, NLP, Deep Learning, Neural Networks, And Intelligent Agent Systems
- Problem-solving
- Adaptability
- Attention to detail
- Creativity
- Teamwork
- Work ethic
- Time management
- Communication
- Leadership
- Business Development
- MLOps (Model Deployment & Monitoring)

Languages

- English
- Sinhala
- Malay
- Tamil

Architect of the OI Brain: Led the development of Outer Insights' proprietary **AI Brain**—a next-generation neural framework combining retrieval-augmented generation (RAG), vector embeddings, and autonomous multi-agent systems. This intelligent core autonomously manages investor outreach, lead qualification, and business development workflows with human-like precision.

Pioneered Applied AI R&D: Directed advanced research programs in LLM fine-tuning, vector databases, and orchestration agents—constantly enhancing the OI Brain's capabilities across dynamic deal flow management, market intelligence, and investor engagement.

Engineered Autonomous Business Neural Networks: Designed intelligent neural systems that autonomously execute capital advisory tasks—automating outreach, follow-ups, and data intelligence processes while improving response accuracy and decision speed across client accounts.

Built Scalable AI Infrastructure: Architected cloud-native infrastructure using containerization, microservices, and CI/CD pipelines—ensuring modular scalability, high availability, and rapid deployment of new AI capabilities across the platform.

Full-Stack Product Delivery: Oversaw the creation of end-to-end SaaS solutions integrating AI-driven backends with seamless full-stack frontends—delivering enterprise-grade functionality to clients in private placement and capital markets.

Deployed Agentic Process Automation (APA): Developed proprietary agentic systems that automate investor matching, CRM workflows, document analysis, and follow-ups—significantly reducing manual interventions and scaling client acquisition operations.

R&D-Driven Competitive Edge: Continuously evolved the OI Brain through deep research in graph attention networks (GATs), agentic orchestration, and neural-symbolic integration—positioning Outer Insights at the frontier of AI-driven venture operations.

Built & Scaled a High-Performance AI Team: Assembled and led a world-class engineering and data science team, driving innovation through collaborative product development cycles and continuous technical excellence.

NLP Innovations for Market Intelligence: Deployed advanced NLP pipelines for real-time investor sentiment analysis, automated deal reporting, and dynamic market trend discovery—empowering clients with actionable insights at scale.

Commercial Impact Focus: Translated cutting-edge AI research into commercialized, investor-facing products that directly power capital raise initiatives and business development for clients across North America, Europe, and Asia.

Senior AI Engineer, Nation.dev, Stockholm
April 2024 - Present

- **Advanced Machine Learning Implementation:** Spearheaded the development of sophisticated machine learning models, with a focus on gradient boosting algorithms, to enhance predictive analytics and decision-making processes across various business domains.
- **AI Project Leadership:** Led cutting-edge AI initiatives, specializing in vector databases, embeddings, and retrieval-augmented generation (RAG) systems, pushing the boundaries of natural language processing and information retrieval.
- **Intelligent Systems Development:** Architected and deployed advanced conversational AI systems using Langchain, significantly improving customer interactions and automating complex query resolutions.
- **End-to-End Infrastructure Design:** Designed and implemented a comprehensive, scalable AI infrastructure from data ingestion to model deployment, ensuring seamless integration of AI capabilities throughout the organization.
- **Business Process Automation:** Engineered an intelligent API pipeline that automates critical business processes, integrating machine learning models for real-time decision making and workflow optimization.
- **Azure Cloud Expertise:** Leveraged Microsoft Azure's advanced features to deploy, scale, and manage AI solutions, ensuring high availability, performance, and security of the AI infrastructure.
- **Team Leadership and Collaboration:** Mentored and led a team of 5 engineers, fostering a culture of innovation and continuous learning in AI development practices.
- **Strategic AI Alignment:** Collaborated closely with business stakeholders to align AI projects with overarching business objectives, maximizing the strategic impact of AI implementations.
- **Optimized Data Processing:** Revolutionized data processing workflows through the implementation of distributed computing techniques and optimized algorithms, significantly enhancing efficiency and accuracy of large-scale data operations.

Venture Consultant, Various Companies, Kuala Lumpur, Stockholm, London, Sacremento, Colombo

December 2022 - June 2025

Auth Hero (Sacramento, USA)

Focus: Strategy & Operations, Venture Development, and Product Consulting for healthcare-adjacent solutions. Supported AI-powered systems with HIPAA compliance focus, venture structuring, and product-market fit advisory.

Edurus AB (Stockholm, Sweden) *(via Nation.dev subcontract)*
Focus: AI System Development – including vector databases, embeddings, RAG pipelines, Markov chains, chatbots (LangChain), full-stack systems, and agentic process automation (APA). Delivered end-to-end AI infrastructure for operational optimization.

SocialPresence.io (London, UK)
Focus: AI Infrastructure & Product Development – Built recommendation algorithms, ad-detection and bot-tracking systems, as well as agentic retrieval architectures for digital marketing and automation optimization.

BetterSmile (Kuala Lumpur, Malaysia)
Focus: E-Commerce Infrastructure, ERP Systems, Fundraising, and Compliance for health and beauty retail brand expansion across Malaysia and Singapore. Supported direct-to-consumer strategies.

Viana Cosmetics (Colombo, Sri Lanka)
Focus: E-Commerce & Export Strategy – Advised on retail channel development, operational infrastructure, and digital growth strategies for beauty products.

Eduplay (Kuala Lumpur, Malaysia)
Focus: AI Engineering – Designed chatbots using LangChain, developed algorithms, and optimized web infrastructure for edtech solutions, supporting digital transformation.

Head of Operations & Finance, PledgeCare Sdn Bhd, Kuala Lumpur
December 2020 - December 2022

- Orchestrated cross-functional teams in Production, Logistics, and Finance, establishing SOPs to streamline operations.
- Collaborated closely with the CEO and Investor to drive strategic growth, leveraging analytics for production performance measurement, cost optimization, and statistical analysis for robust supply chain resilience.
- Achieved legal compliance for the pet food manufacturing business, securing licenses from key Malaysian ministries, leading to tax exemptions and eligibility for government grants.
- Implemented quality control measures, visualized dashboards, and MRP systems meeting GMP and HACCP standards for export readiness.
- Managed contracts with Suppliers, Retailers, and OEM Partners.
- Prepared consolidated financial statements per IFRS & MFRS standards, facilitating investor and regulatory reviews.
- Partnered with Marketing to enhance branding strategies in product packaging, customer experience, and email marketing. Developed dashboards to optimize ROAS, CAC, and other performance metrics using META & Google API.

Operations Coordinator, PledgeCare Sdn Bhd, Kuala Lumpur
June 2020 - December 2020

- Led strategic initiatives with a focus on ERP infrastructure development using Google Cloud Platform and automation to enhance E-commerce performance, marketing analytics, and manufacturing logistics.
- Custom-programmed systems for inventory management, packing for logistics (REST API), and product sales dashboards, enabling data-driven decision-making and efficient operations.
- Developed a product development calculator to meet nutritional criteria, leveraging programming languages such as Python, JavaScript, and VBA.
- Expanded business channels from the website to E-commerce platforms in Malaysia, contributing to business development.
- Played a key role in financial planning & analysis, budgeting, production planning, and forecasting, supported by impromptu overview and ETL dashboards.
- Actively contributed to hands-on research and development of products to meet Biologically Appropriate Raw Food (BARF) diet and Association of American Feed Control Officials (AAFCO) standards.

Finance Reporting Executive, EC-Council International, Kuala Lumpur
March 2019 - February 2020

- Oversaw ad hoc duties assigned by the Vice President of Finance, focusing on Business Intelligence for review by External Auditors, Investment Bankers, and the Board of Directors.
- Led internal audit efforts, financial analytics, and business insights, producing group performance reports for the CEO.
- Compiled group sales reports as per EY (Ernst & Young) requirements for various offices, including Gilmore (Royalty-based revenue stream), Asia, International (Hong Kong Registered), Online Store, and Online Accredited Education Service in the United States, reporting directly to the Global Internal Audit Manager.
- Conducted monthly reimbursement audits using vouching, tracing, and other substantive procedures for the India office, reporting findings to the Internal Audit Manager.
- Developed and maintained an automated sales performance dashboard using advanced Excel functions for the Group Chief Operating Officer (COO), providing deep business insights to identify revenue shortfalls by division for products.

Research Intern, Frost & Sullivan (Asia-Pacific), Kuala Lumpur
December 2018 - January 2019

- Specialized in market research and enhancing primary research data.

- Leveraged machine learning regression to enhance scoring and rating systems, identifying key parameters impacting overall scores.
- Conducted statistical and data analytics in the banking industry in the Philippines.
- Analyzed customer surveys for education services in Malaysia, interpreting statistical data to determine survey winners.

Education

Master of Artificial Intelligence, Monash University
July 2023 - November 2025
Graduate Program

Bachelor of Business and Commerce, Monash University (CGPA 3.4)
December 2018
Applied Economics & Accountancy

Cambridge A-Levels, Lyceum International school (2A* 1A)
