SOFT SKILLS

- Problem Solving
- Hardworking
- Persistent

TECHNICAL SKILLS

Programming
Java, Javascript, ReactJS, Python, Golang.

Database
MySQL, DB2, Elasticsearch, Cassandra

Others
AWS, Kubernetes, Helm Charts, Gitlab, Jasper Reports, ELK, Apache Kafka

EXPERIENCE

Backend Software Engineer

CSI Interfusion, GXBank
2024 May - Present

Onboarding - NTB/ETB Business Onboarding for Malaysia

- Part of the GXBank Onboarding team to deliver customized onboarding experience to Sole Prop Business Customer that offers both CASA and Lending Account.
- Re-use and enhance existing backend services such as Application, Experience and Customer Master Services to support new Business Onboarding Use Case. Handle production deployment and maintain backward compatibility of each feature change in production.
- Integrate with APIs from partner services: Grab, bank statement upload feature from external vendor Perfios to retrieve transactions data as part of the Business Verification Flow.
- Supports Staging / Beta Testing and scheduled production on-calls. Able to identify root cause, propose solution and fix as soon as possible.
- Use existing tool such as n8n to do test data automation, resolve difficulty in getting Business Related test data such as CTOS Report and Grab Transaction Data.

Onboarding - NTB Retail Lending Onboarding for Malaysia

- Spike, design and implement the workflow for NTB Retail Lending Onboarding. Assess the impact of the changes on different backend services. Work with mobile team and layout API Spec for integration.
- Work with data team in terms on data flow and data understanding. Assess impact on how data flow is affecting on onboarding dashboard and business insights.

Onboarding - NTB Retail CASA Onboarding for Malaysia

- Maintain and monitor existing retail CASA Onboarding thru Datadog alerts and perform Minor Bug Fixes.
- Work with data team in data quality assessment. Perform data patching on existing customer's data to ensure meeting compliance and data quality standard.

Tech Stacks: AWS, Datadog, Gitlab. Helm Charts, Golang, Apache Kafka

Software Consultant
AceAtt Sdn Bhd
2022 Aug - 2024 April

DICE (Data Insight Customer Engagement Project) @ Alliance Bank

- Lias with Business analyst to work out user stories, report specification and format for different engagement campaign EG: Referral Campaigns, Cross Sell Campaigns.
- Develop reports using the Spring Boot framework, data extraction from Cassandra Database and excel format report generation with Jasper Reports.
- Support Business analyst on UAT testing to verify Data accuracy and consistency.
- Generated reports provide insights to Business User for them to capture customer's behaviors and help them expand their customer base.

ACIS (Automated Customer Incident Support Project) @ Alliance Bank
